

Tensator's Banner Solutions

Tensator's Banner Solutions are a cost effective and flexible way to extend or create indoor or outdoor spaces. They can be fully customisable so are a great opportunity to add branding, messages or advertising to your space.

The banners can be easily replaced as seasonal offers or messages change and they are easy to install, dismantle and store so any layout changes can be done with minimal disruption.

Café Banner range

Tensator's Café Banner range is suitable for many different applications including schools, shopping centres, events and museums as well as bars, restaurants and cafes. They are offered as surface fixed or free standing with the option of 3 hard wearing and durable banner materials; PVC, mesh or canvas.

Chrome

The chrome finish is ideal to be used inside.

Stainless steel

The stainless steel finish is available in 2 grades, a standard 304 grade and also a rust retardant grade of 316, which is available to order. These banners can be used outside even in areas subject to heavy weather conditions.

Tensator's Tensabarrier® Banner Solutions

Tensator's Banner Solutions can be fixed onto any existing Tensabarrier® post allowing you to create a space using webbing and banners. They can be used to quickly and easily create advertising space or highly visible, high impact advisory or media messaging. The Tensabarrier® is available in a broad choice of colours and finishes and is ideal for indoor applications..

Tensabarrier® Banner Solution

Tensator's Tensabarrier® Banner uses one beam across the top, which is not visible from the outside, and is secured at the bottom.
