

# 889 Advance Post

## With Standard Width Webbing

Stylish and sleek design. Features the universal base, with the lowest leading edge on the market - enabling accessibility for all. Ideal for a variety of applications.

### Features & Benefits

- The advance post features a high quality steel post with a hard wearing cast iron base which has been designed with accessibility in mind.
- The edges of the base taper towards the floor to ensure wheelchairs, pushchairs and suitcases can roll over the base with ease - creating a less obstructive queue environment.
- Optimum post height, ensuring difficulty for customers to go underneath or over the webbing barrier.
- The safest barrier on the market - our cassettes have a unique braking system for slower webbing retraction.
- 36° displacement angle, preventing the post from easily toppling over.

### Product Specification

- Metal post available in a range of powder coated colours or metal finishes.
- Available with any Tensator® standard (50mm) webbing options.
- Modular webbing cassette - all cassettes come as standard with our four-point anti-tamper connectivity. This allows you to connect other Tensabarrier® products to the receiver splines on the cassette head.
- Comes as standard with an anti-tamper tape end.
- Compatible with all Tensabarrier® accessories including our range of post top signage and wall clips.

### Applications

- Enhance and manage queuing spaces.
- Cordon off out of service areas.
- Ideal for a variety of applications including: airports, retail outlets, hotels, casinos, movie theatres.
