

# Storage Cart

## For the safe transportation of barriers

A robust storage cart designed to safely transport, store, and organise Tensabarrier and post and rope stanchions with minimal handling.

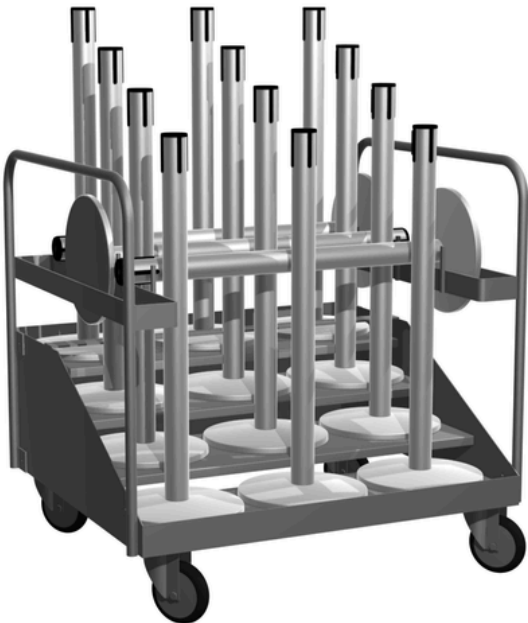

### Features & Benefits

- Holds up to 15 Tensabarrier® or 12 Lawrence® Post and Rope stanchions.
- Easy to manoeuvre and fit through doorways.
- Features padding to prevent damage to the posts.
- Integrated storage and transport solution that keeps posts organised and protected when not in use.
- Transporter stores posts and protects them.
- Speeds up queue assembly and disassembly, improving operational efficiency.
- Reduces physical strain from having to lift and carry posts for any distance.
- Four tiered, low-level platforms eliminate the need to lift posts above waist height, supporting health & safety compliance.
- Towing plates allow multiple transporters to be connected and moved together, improving handling efficiency.

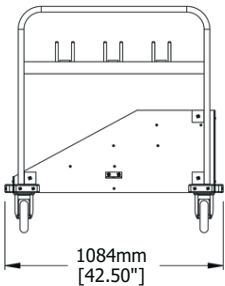

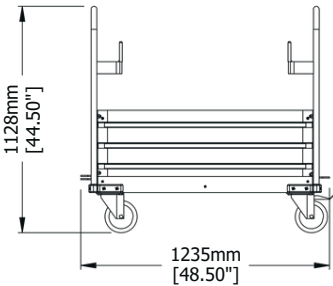

### Product Specification

- Comprises of 14 shelves for slotting Tensabarriers in place.
- Handlebar at optimal 990mm height for handling heavy loads.
- Optional second handlebar available for other end of cart.
- Available in a range of colours and finishes upon request.

### Applications

- Suitable for any environment that requires regular reconfiguration of queues.
- Ideal for airports, exhibition venues, sports & music events, large retail outlets etc.
